**Address:** Kostzy Anggrek Livin, Jalan Anggrek Cakra No. 35, RT.7/RW.7, Kebon Jeruk 11530

## SUMMARY

Computer Science student at Binus University with a strong creative-technical foundation built through a Multimedia background at SMK Pariwisata Harapan and two internships in design and digital content production. Proven ability to manage multi-client creative workflows delivering consistent visual outputs across photography, video, and graphic. Complements creative industry experience with software development skills gained through hands-on academic projects and coursework.

## EDUCATION

**Bina Nusantara University |** Bachelor's Degree in Computer Science **(2024 – Present)**

**SMK Pariwisata Harapan** | Multimedia **(2021 – 2024)**

## WORK EXPERIENCE

**Graphics Designer & Creative Content Intern | PT Kalman Group Indonesia Juni (2023 – September 2023)**

- Handled content production cycle (photography, video editing, photo editing) for 5 clients digital channels
- Designed promotional materials (flyers, reels) for multiple clients.
- Served as both designer and on-site executor.

**Graphics Designer & Creative Content Intern | SDS Visual — PT Selda Design & Digital Marketing (September 2023 – Januari 2024)**

- Managed creative content production for 3 digital clients concurrently while maintaining brand consistency across platforms.
- Strengthened project management skills by balancing multiple deadlines, consistently delivering outputs.
- Expanded role from designer to on-site production coordinator, bridging the gap between creative concept and final visual execution across client photoshoot and filming sessions.

## PROJECT

**Cookies Risk Analyzer** | Web Privacy Analysis Tool (Team Project) (**2026)**
*Stack: Node.js, React, Playwright, Docker*

- Built an automated tool that detects and classifies third-party tracking cookies using headless Chromium.
- Scores privacy risk with the OWASP Risk Rating Methodology (Likelihood × Impact, 1–9 scale).
- Checks regulatory compliance against GDPR and Indonesia's Personal Data Protection Law (UU PDP No. 27/2022).

**Online Travel Agent Mobile App** | Security Assessment & Penetration Testing (Team Project) (**2026)**
*Tools: JADX-GUI, APKTool, Smali, ADB, Rooted AVD, DB Browser for SQLite*

- Conducted a mobile penetration test on the Online Travel Agent Android app, identifying 4 CVSS-scored vulnerabilities, missing root detection, plaintext token/data exposure, unencrypted SQLite database access, and insecure backup configuration.
- Decompiled the APK and extracted app data via a rooted emulator, uncovering plaintext JWT tokens and Personally Identifiable Information in SharedPreferences and an unencrypted 10-table SQLite database.
- Documented findings and remediation recommendations (encrypted storage, root detection, short-lived tokens) in a formal report with supporting diagrams and a presentation.

**ResQ-Food** | Food Waste Reduction Platform (Team Project) (**2024)**
*Stack: Next.js, React, Tailwind CSS, Vercel*

- Built a location-based web application connecting users with local stores to purchase discounted surplus food, aiming to minimize food waste.
- Implemented a responsive and modern user interface using Tailwind CSS and React for seamless

navigation across all devices.
- Deployed the platform on Vercel for high availability and optimized frontend performance.

**AI Handsign Recognition (ASL)** | Computer Vision & Machine Learning (Team Project) (**2025)**
*Stack: Python, TensorFlow, OpenCV, MediaPipe, Flask, Scikit-learn*
- Developed an AI-powered application capable of translating American Sign Language (ASL) into text in real-time using Computer Vision.
- Utilized MediaPipe for precise hand landmark extraction and trained a neural network model via TensorFlow and Scikit-learn for high-accuracy gesture classification.
- Integrated the machine learning inference pipeline into a backend service using Flask.

**Library Management System** | Full-Stack Web Application (Team Project) (**2025)**
*Stack: Laravel, PHP, MySQL, Vite*
- Engineered a comprehensive library management system featuring robust CRUD operations for book inventory and category-based search.
- Developed a secure borrowing and return tracking module to streamline administrative workflows.
- Architected a relational database schema in MySQL and utilized Vite for rapid frontend asset bundling.

**Food App** | Mobile Application (Team Project) (**2024)**
*Stack: React Native, Node.js, PostgreSQL, Mapbox*
- Created a cross-platform mobile application for food ordering and delivery using React Native.
- Integrated Mapbox API to provide real-time order tracking and location-based restaurant discovery.
- Designed a scalable Node.js and PostgreSQL backend to handle order processing, user authentication, and restaurant rating systems.

**BelanjaRia E-Commerce** | MERN Stack Application (**2024)**
*Stack: MongoDB, Express.js, React.js, Node.js*
- Built a full-stack e-commerce platform featuring dynamic product management, a shopping cart, and secure user authentication.
- Implemented a streamlined checkout process with a simulated payment gateway integration.
- Developed a RESTful API using Express.js and utilized MongoDB for flexible, scalable document-based data storage.

## SKILLS

- Programming Languages: Python, C, Java, HTML, CSS
- Security: Frida, BurpSuite, picoCTF
- Tools: Adobe Premiere, Lightroom, Photoshop, illustrator, Canva, VSCode, JADX

## EXTRACURRICULAR ACTIVITIES

- Committee Staff Inagurasi FYP, 2025
- Volunteers Luminova, 2025
